

THE EDGE OF INNOVATION

February 17, 2026

Estron Chemical supports and fully complies with the Dodd-Frank “Conflict Minerals Act” adopted in August 2012. No raw materials originating from the Democratic Republic of the Congo or adjoining countries are used in any Estron Chemical products. More specifically, any tin-containing Estron products are manufactured from raw materials that are classified and certified as DRC Conflict Free. Estron Chemical maintains relevant documentation from our raw material supplier who has, in turn, identified and verified upstream sources as being compliant.

A handwritten signature in blue ink, appearing to read "R. Auerbach".
